## Competent and Ethical Practices in Applied Behavior Analysis

**1. What type of research focuses on the systematic manipulation of variables to determine if an intervention is effective in changing socially significant behaviors?**

A. Conceptual
B. Basic
C. Applied
D. Systematic

---

**2. Who can provide informed consent?**

A. A child's teacher
B. Children
C. Legal guardians of a participant
D. Vulnerable populations

---

**3. The decision-making model provided in the BACB Ethics Code can be considered what type of prompt for expected behavior?**

A. textual prompt
B. visual prompt
C. positional prompt
D. physical prompt

---

**4. What report was monumental in outlining a foundational framework for protecting human participants in research?**

A. The Bradford Report
B. The Research Report
C. The Justice Report
D. The Belmont Report

---

**5. What is the purpose of conducting behavior analytic research?**

A. To improve the lives of individuals beyond those participating in research.
B. To build an evidence base to establish new interventions.
C. To validate previously studied interventions.
D. All of the above.

---

**6. What term refers to something that impacts cultural norms, where rules and systems of reinforcement guide expected behaviors for members of those communities and cultures?**

A. rule-governed behavior
B. textual prompt
C. cultural behavior
D. beneficence

---

**7. Which BACB Ethics Code ensures that behavior analysts do not abuse their power or authority by coercing or exploiting persons over whom they have authority?**

A. 6.07 Conflict of Interest in Research and Publication
B. 1.11 Multiple Relationships
C. 6.03 Research in Service Delivery
D. 1.13 Coercive and Exploitative Relationships

---

**8. What design is considered the gold standard in behavior analytic research?**

A. randomized controlled trial
B. single-subject design
C. group design
D. descriptive reseach design

---

**9. Which variables should be considered when recruiting participants?**

A. Access to transportation
B. Access to medical diagnoses
C. Access to food
D. All of the above.

---

**10. How can behavior analysts ensure they are using correct terminology?**

A. Look it up on the internet
B. Ask for preferences from communities and participants regarding preferred terminology
C. Only use person-first language
D. Only use identity-first language
