 - B. more supervisor support for a practitioner
 - C. less preparation time for a practitioner
 - D. less supervisor support for a practitioner
-

11. What should a practitioner do as a TBH session begins?

- A. discuss the expectations of the session
 - B. scan the room to ensure other individuals are not present that should not be as well as ask if anyone else is on the call
 - C. review the materials that will be used throughout the session
 - D. ask that any technology issues be reported immediately
-

12. An individual should plan to get ready for a meeting approximately _____ prior to the call beginning.

- A. 10 minutes
 - B. 5 minutes
 - C. 20 minutes
 - D. 15 minutes
-

13. Which requirements should systems used for remote supervision align with?

- A. BACB requirements
 - B. PHI requirements
 - C. HIPAA and FERPA requirements
 - D. Privacy Rule requirements
-

14. What type of approach should be taken to assess why avoidance behaviors are occurring from either a practitioner or supervisee?

- A. direct approach

- B. functional approach
 - C. consulting approach
 - D. supportive approach
-

15. What term is known as outlining the roles and responsibilities that coincide with a BCBA® position at the supervisee's place of employment that can be used to determine the necessary skills needed for a desired position within an organization?

- A. job model
 - B. task analysis
 - C. procedural list
 - D. job description
-

16. How many steps are used in behavior skills training?

- A. 5
 - B. 8
 - C. 4
 - D. 6
-

17. What should be provided for the supervisee that allows them to know what the skill should look like when it is performed at proficiency?

- A. handout
 - B. picture model
 - C. demonstration
 - D. recording of skill being done incorrectly for comparison
-

18. What step should be completed after a supervisee has been able to demonstrate that they are competent in implementing the skill?

- A. allow the supervisee to implement the skill without supervision
 - B. determine how the skill will be maintained and generalized
 - C. request that the supervisee teach the skill to someone else
 - D. provide additional feedback to enhance the skill of the supervisee
-

19. Service recipient improvements can be used to determine_____.

- A. generalization effects of the skill taught
 - B. if a service recipient agrees that a skill is appropriate
 - C. the effectiveness of supervision
 - D. the appropriateness of the skill taught
-

20. What type of services consist of a consultant meeting with different consultees through different technological devices and applications as a way for supporting the needs of service recipients?

- A. teleconsultation services
 - B. telebehavioral health services
 - C. consultative services
